A PROGRESSIVE LEARNING VILLAGE FOR THE EARLY YEARS IN SIVARAM NAGAR, COIMBATORE

Welcome to MINDFL

The Child. The Family. The Educator.

These three protagonists form the heart of our learning village. By nurturing the relationships between them, we raise confident, compassionate, and creative thinkers. Through nature, play, and mindful exploration, we **grow** together.

Learning is a collaborative adventure.

hands in soil
seed goes in
water, wait
it grows

Nature is our Third Teacher

in and out
light to shade
rest, move
move again

FLUID INDOOR AND OUTDOOR SPACES

still at first
watching close
a small move
then another

(Being observant like a fish)

Progressive Learning Opportunities

Rooted in Nature . Guided by Research .

Our **GROW** approach is not just play, it is a purposeful pedagogical framework.

Our Program:

- **Parent–Toddler Program**
6 months – 24 months
- **Sprouts**
2 – 3 years
- **Seedlings**
3 – 4 years
- **Buds**
4 – 5 years
- **Blossoms**
5 – 6 years

Learning How to Learn

Eco-Conscious Living

Before classrooms and curricula and screens — there was a child and the world. MINDFL is a return to that original childhood. — Vaikunth Sivashenthan Govindarajan, Founder

(About us)

Strong foundations for a better future

Learn how we help children develop into confident, compassionate, and creative problem-solvers.

Curious Children

We believe children are competent learners capable of engaging fully with the ideas and the world around them. Children learn to develop and grow to their fullest potential in an environment that is emotionally secure, socially complex, and educationally challenging.

Intentional Teachers

Teachers have the ability to make a difference in each child's experience. Our teachers implement daily practices that are intentional in promoting cognitive and social strategies. These skills support the development of confidence, empathy, and creativity in young children.

Partners with Parents

When parents are actively involved in their preschooler's early childhood educational experience, not only do the children benefit greatly, but teachers do as well. Our partnerships with parents contribute to a vibrant community.

About: (ABOUT PAGE)

What MINDFL Means:

MINDFL means Mindfulness, being fully present and aware in the moment

Vision:

A world where nature, curiosity, and meaningful experiences nurture a lifelong love for learning, growing children into mindful and compassionate learners.

Mission:

At MINDFL Early Years, we create a nurturing, nature-integrated learning environment where children explore, play, and discover with curiosity and confidence. Through thoughtful guidance, meaningful experiences, and strong partnerships with families, we support the holistic development of every child, cultivating independence, creativity, empathy, and mindful growth.

Philosophy:

We believe that every child is a natural-born explorer whose journey begins with a sense of wonder. Our approach is rooted in the timeless truth that it takes a village to raise a child. By reclaiming that village, we provide a sanctuary where the natural world is a co-teacher and families are true partners. We don't just teach, we protect the heartbeat of childhood ensuring every child feels seen, heard, and empowered to grow with empathy and purpose.

Founder's Message

Before classrooms and curricula and screens — there was a child and the world. MINDFL is a return to that original childhood.

"Let us learn from our children, let us live with our children: then will the life of our children bring us peace and joy, then we shall begin to grow wise, to be wise." — Friedrich Fröbel

Dear Families,

I recently stood before an art installation titled *Back to Square One* — a rigid grid of squares taped onto a cold floor. I watched people step into them and pause, hesitant to cross the lines. It didn't feel like art to me. It felt like the contained reality of modern childhood.

In my childhood, intergenerational experience was the only classroom that mattered. Education wasn't delivered to us. We lived it. Today, I look at my niece and see an isolated world that has quietly shrunk. In an effort to protect childhood, we have inadvertently caged it by trading discovery for four walls and screens.

I didn't start MINDFL to build another school. I started it to reclaim the learning village — with intention.

I grew up close to nature. That closeness shaped everything I came to believe about childhood. It led me to Friedrich Fröbel, who started and termed the first Kindergarten in 1837. He saw teachers as gardeners and children as plants to be nurtured. He understood the concerns families carry, especially the instinct to shield children from the uncertainty of the natural world. Yet he knew that a child's safety isn't found in avoiding the world, but in learning to care for it:

"The child who has cared for another living thing is more easily led to care for his own life. The care of plants will also satisfy his desire to watch living creatures, for he will see birds and butterflies and beetles coming nearby." — Fröbel, in Lilley, 1967

By nurturing a seedling or observing a beetle, a child builds the caution and confidence needed to navigate the real world. At MINDFL, we believe a child flourishes best when their entire ecosystem of parents, teachers, wider community, and nature is aligned. We don't just invite families in. We grow alongside them.

On Fröbel's grave are inscribed these words: *"Let us live for our children."*

MINDFL is our answer to that call and our gift to yours.

Let's grow it back, together.

Walking this path with you,

Vaikunth Sivashenthan Govindarajan

Our Team

Our Educators. Our Nature Crafters.

WHO THEY ARE

Present. Observant. Intentional.

They do more than teach. They notice. Each moment of a child's day is observed with care, documented with thought, and reflected upon with purpose. At MINDFL, curiosity is not directed—it is gently provoked, extended, and respected. We believe learning happens in a relationship: between child, educator, and the natural world. When these connections are nurtured, growth happens naturally.

HOW WE PREPARE THEM

Grounded in practice. Guided by GROW.

Every educator begins with our GROW orientation — a deep immersion into translating philosophy into the living rhythm of a child's day. Through ongoing workshops and reflective practice, they refine their craft. They view child development as a journey, play as the highest form of research, and observation as the foundation for all assessment. This is not static training. It evolves just like the children they guide.

HOW THEY WORK WITH FAMILIES

The learning village, in rhythm.

Families are not outside the learning journey, they are the heart of it. Through regular observations and shared insights, our Nature Crafters ensure that the world of MINDFL and the world of home stay in harmony. Because when both worlds move in rhythm, a child doesn't just grow, they flourish.

Join the Learning Village (In the same page of Our Team)

Become a Nature Crafter.

This is not a typical classroom. At MINDFL, your day begins with observation. We are building a learning village where nature is the teacher, play is the work, and educators don't just instruct—they guide, observe, and respond.

Who You Are : You belong here if you are patient, present, and deeply curious. We look for those who believe that the greatest lessons are found in the quietest moments of play and who are ready to grow through reflection and intentionality.

The Craft As a Nature Crafter, you will shape meaningful experiences, document the "hidden" moments of learning, and partner closely with families. You won't just follow a curriculum; you will help write the story of a child's journey.

Apply to Join Us

We are always looking for vibrant hearts to join our team. Tell us why this approach speaks to you.

The GROW Framework

Where Global Wisdom Meets Natural Potential

At MINDFL, we move beyond the traditional classroom. We believe children are naturally curious explorers, not passive recipients of information. Our role is to guide, observe, and support their journey through an intentional, child-centric environment.

The Four Pillars of Our Pedagogy

Pillar	Philosophy	The Experience
G — Guided	<i>Montessori</i>	Purposeful Independence. We replace worksheets with a "Prepared Environment." Using real tools and natural materials, children master concepts through hands-on discovery.
R — Rhythmic	<i>Waldorf</i>	The Joy of Slow. A calm, media-free daily flow that protects the wonder of childhood. Through storytelling and nature, we create a predictable, unhurried routine.
O — Observational	<i>Reggio Emilia</i>	The Hundred Languages. We view children as researchers. By observing their unique interests, we turn to a simple "Why?" into a deep exploration.
W — Whole-Child	<i>Gesell</i>	Developmental Readiness. We align learning with biological maturity, not age. By removing the pressure of acceleration, we build genuine confidence and wellbeing.

At MINDFL, we respect each child's readiness and support their growth at the right time.

— **Vaikunth Sivashenthan Govindarajan, Founder**

Gesell Program, Yale Child Study Center, USA

We are architecting a new standard for the formative years.

At MINDFL, we strive to be a champion of early childhood education. We believe learning unfolds naturally through rhythm, nature, and meaningful relationships. Rooted in global wisdom and the spirit of the learning village, MINDFL is a living environment dedicated to nurturing children into confident, compassionate, and capable human beings.

Our Unique Offerings

Thoughtfully Designed for Childhood

At MINDFL, every experience is intentional—created to support confidence, curiosity, emotional security, and meaningful learning.

Versatile Pedagogical Support (Top Image)

Small group learning designed for deeper engagement, individual attention, and personalized developmental support.

Talking Chairs(Top Image)

A dedicated conflict-resolution space where children learn empathy, listening, and peaceful communication.

Outdoor Learning (Top Image)

An outdoor learning programme through the MINDFL Loop where movement, nature, and exploration become part of everyday learning.

Farm School(Top Image)

Nature as a teacher through hands-on gardening, harvesting, sensory play, and real-life environmental learning.

Unique Wellness Experiences(Top Image)

Mindful activities, movement, rhythm, and sensory experiences that support emotional, physical, and mental wellbeing.

Goodbye Windows(Top Image)

A gentle transition ritual that helps children move from home to school with comfort, confidence, and emotional security

Why the Early *Years Matter.*

The first six years are not preparation for learning. They are the most intense period of learning that will ever occur. What happens here — the relationships, the environments, the freedom to explore — shapes the architecture of everything that follows.

THE THINKERS BEHIND MINDFL

The Thinkers Behind MINDFL.

MINDFL is not built on one philosophy. It is rooted in the collective wisdom of the greatest minds in childhood education. Here is what they believed — and exactly where you will see their ideas in your child's day.

Friedrich Fröbel

1782–1852 · FOUNDER OF KINDERGARTEN

Fröbel gave the world "Kindergarten" — a garden for children. He believed teachers were gardeners, children were plants to be nurtured, and nature was an essential teacher. Play, he said, was a child's highest form of work. His ideas were considered radical in 1837. They are now considered foundational — and they are the beating heart of everything MINDFL does.

"At MINDFL — our nature-based environment builds in children the care for living things."

Maria Montessori

1870–1952 · PREPARED ENVIRONMENT

Montessori believed the environment itself was a teacher. Children chose their own work, moved freely, and mastered real skills with real tools. Children learn best when they are trusted to lead.

"At MINDFL — in our G pillar, our natural materials, and in every moment a child chooses what to explore next."

Rudolf Steiner

1861–1925 · WALDORF EDUCATION

Steiner understood that childhood has its own rhythm — rushing it does lasting damage. He built unhurried routines around storytelling, seasonal rhythms, and creative play. Wonder is something to be guarded, not consumed.

"At MINDFL — in our R pillar, our screen-free environment, and in the morning circle that starts every child's day."

Loris Malaguzzi

1920–1994 · REGGIO EMILIA

Malaguzzi believed children speak in a hundred languages — movement, art, clay, silence — and that schools systematically silence most of them. He placed observation and documentation at the heart of teaching.

"At MINDFL — in our O pillar, our atelier, and in the way our Nature Crafters document each child's day."

Arnold Gesell

1880–1961 · GESELL PROGRAM IN EARLY CHILDHOOD

Gesell mapped childhood development as a biological process with its own internal clock. Readiness, not age, should determine learning. Pushing a child before they are ready doesn't accelerate them — it creates anxiety.

"At MINDFL — in our W pillar, in how we never rush a child, and in our founder's training at the Gesell Program in Early Childhood, Yale University."

THE COMMON THREAD

Different philosophies. One belief.

Different centuries, different classrooms — but one root beneath all: **the child already knows how to grow**. The adult's role is not to direct that growth, but to trust it.

Our Programs(Page)

At MINDFL, our "Learning Village" is a space where children move from the security of home into a world of discovery. We focus on **age-appropriate practices**, blending the best global pedagogies to honor each child's natural pace and development.

Through relationships with peers, educators, families, and nature, children construct meaning, express ideas, and grow with confidence.

Parent–Toddler | 6 – 24 Months

Our Youngest Learners, Our Deepest Care A secure sanctuary where the first seeds of independence are planted. In a calm, plastic-free environment, we use **RIE (Resources for Infant Educators)** inspired practices to build trust and respectful attachment. Here, care routines become moments of deep connection, helping families understand and support their child's earliest developmental milestones.

- **The Rhythm:** 2-Hour Sessions | 3 Days a Week

Sprouts | 2 – 3 Years

The Leap into Autonomy As children find their voice, we support their growing independence within a nurturing "Learning Village" setting. This stage focuses on emotional security and rapid language growth through rhythmic storytelling and natural play. Using materials like wood and clay, children build the self-help skills and confidence needed to navigate their world with ease.

- **The Rhythm:** 3-Hour Independent Sessions | 5 Days a Week

Seedlings | 3 – 4 Years

Curiosity Becomes Inquiry Children move from asking "What?" to "How?", forming friendships and expressing complex ideas. Through theme-based projects and the "Hundred Languages" of art and movement, we encourage collaborative problem-solving. Here, creative expression becomes a tool for children to explore and understand the natural world.

- **Independent Pathway:** 9:00 am – 12:30 pm
- **Full Day Pathway:** 9:00 am – 4:30 pm

Buds | 4 – 5 Years

Building Meaning and Understanding We bridge the gap between play and structure by introducing the mechanics of learning through real-world contexts. We focus on literacy and numeracy readiness—honoring natural maturity rather than the pressure of rote learning.

Through phonics and group discussion, children develop personal responsibility and a love for discovery.

- **Independent Pathway:** 9:00 am – 12:30 pm
- **Full Day Pathway:** 9:00 am – 4:30 pm

Blossoms | 5 – 6 Years

Ready for School. Ready for Life. The culmination of the MINDFL journey. We prepare children for a confident transition to primary school by focusing on critical thinking, emotional strength, and self-regulation. Our Blossoms graduate with strong foundations in reading and arithmetic, having developed the capacity for **independent thinking and confident self-expression**.

- **Independent Pathway:** 9:00 am – 12:30 pm
- **Full Day Pathway:** 9:00 am – 4:30 pm

Architecture:

"Study nature, love nature, stay close to nature. It will never fail you."

— Frank Lloyd Wright

An Experience Under a Living Canopy

We are designing more than a school; we are creating an ecology of spatial excellence. At the heart of our campus is the Roof—a signature, multi-faceted canopy that acts as a protective wing for our "Learning Village". This design creates a low, human-scale environment that feels like a home rather than an institution.

We believe that what children grow around, becomes what they carry within. By using honest, natural materials, we ensure children feel a deep sense of belonging and cultural relevance from the moment they arrive.

Safety at Every Step...

Physical and psychological security is built into the very geometry of our classrooms. Every space is designed to be a protective sanctuary that settles the mind, allowing little learners to feel a deep sense of calm and focus.

By removing rigid corridors and fixed "teacher positions," we ensure there is no single point of control. This creates a transparent, fluid flow where children feel safe to explore independently while guides move naturally among them. From the ergonomic furniture to the approachable textures, every surface is engineered to the highest safety standards, allowing children to focus entirely on their natural curiosity.

...All Around the Loop

India currently faces a significant health challenge as the second-largest nation in terms of **child obesity**. Recognizing that modern childhood is facing a silent crisis of sedentary living, we were intentional in designing a landscape that demands movement.

Our **MINDFL Loop** is a continuous, elliptical pathway that wraps around the campus, providing a naturally protected perimeter where children can run, climb, and balance freely. This pathway integrates over 36 fundamental types of play into the daily rhythm, ensuring that physical activity is never a "break" but a constant, healthy part of learning. Because when the body moves, the mind opens.

Design for the Senses

In clinical care, carefully designed lighting improves recovery; we bring that same sensitivity into early learning. Our **Human-Centric Lighting** aligns the school day with a child's natural biological clock to regulate mood and focus.

- **Spatial Awareness:** Varying ceiling heights act as a tool for children to instinctively understand the volume and rhythm of their world.
- **The Power of Greenery:** We have replaced concrete with a lush landscape that increases attention spans and settles the mind.
- **A Living Ecosystem:** The sound of water and the visits of birds teach children to co-exist with a vibrant world.

Admission Process:

The Journey to MINDFL

A Thoughtful Path to Joining our Community

Choosing an early years environment is a milestone for your family. At **MINDFL**, our admission process is not a series of tests, but a gentle unfolding, a chance for us to understand your child's unique rhythm and for you to experience our **Learning Landscape** firsthand.

The Four Stages of Connection

1. The Digital Inquiry

Your journey begins with a moment of curiosity. Share your details through our **Expression of Interest** form. This simple first step allows us to understand your family's needs and aspirations.

2. The Landscape Dialogue & Tour

We invite both parents to step into our campus for an immersive walkthrough. Rather than a formal interview, this is a **Landscape Dialogue**. We will explore our studios together, discuss the **GROW Framework**, and visualize how your child will navigate our fluid architecture.

3. The Child Observation & Play Session

At MINDFL, we don't "screen" children; we observe them. We host a gentle play session where your child can explore our **Authentic Materials** while our educators observe their natural curiosities and social cues. This ensures our environment is the perfect "third teacher" for their current developmental stage.

4. Parents as Partners

At MINDFL, enrollment is the beginning of a lifelong partnership. We work hand-in-hand with you to ensure a **Rhythmic Transition** from home to school. Through regular developmental dialogues and collaborative goal-setting, we ensure that your child's growth is supported consistently across both worlds.
